Management Discussion and Analysis

The management of Hit Kit Global Solutions Limited presents the analysis of the performance of the company for the period 2011-12 and its outlook for the future. This outlook is based on an assessment of the current business environment. It may vary due to future economy and other developments both in India and Abroad.

Although economy has been growing slowly including the retail sector, there were several complex challenges facing this sector. Despite of the challenges your company has remained resilient against adversities and has leveraged opportunities to deliver results.

Outlook

Global Outlook

The global economy still emerging from the after match of the global financial crisis, consolidated its recovery in 2011. The signs are good that despite the shocks of the first quarter of 2011 – including instability in the Middle East and earthquake, tsunami and radiation disasters in Japan – Growth in the U.S., Europe and several significant emerging markets are supporting the global recovery. But significant risk continue to hamper global growth, Including rising oil and commodity prices and persistent global imbalances resulting from a slowdown in the Chinese economy and the fiscal challenges in the U.S., and Eurozone. These global development will have an impact in the coming year not only on international investors but also on the domestic Indian investment climate.

Indian Outlook

The Global Economy has entered into a very difficult phase characterized by significant downside risks and fragility. The financial mayhem generated by the deepening of the fiscal crisis in Europe has spread to both developing and high income countries and is generating significant headwinds.

Against a backdrop of an uncertain global environment, the Indian economy faced twin macroeconomic challenges of managing growth and containing inflation during the fiscal 2011-12. The factors which influenced the current macroeconomic climate in India and interrupted recovery were intensification of debt crises in Euro zone, political turmoil in Middle East, fluctuating global commodity prices, hardening of international prices of crude oil, stagnation in Japan, etc.. GDP is estimated to grow by 6.9 per cent in 2011-12, after having grown at 8.4 per cent in preceding two years. Slowdown in comparison to preceding two years is primarily due to deceleration in industrial growth. India however remained front runner in economic growth in any cross country comparison. India's GDP growth in 2012-13 is expected to be 7.6 per Cent.

Nature of Business
